# POS BRIDGE

BY NETCHEX

## Fully Integrated. Complete Functionality.

### Time and Attendance import from POS into Netchex

- Map job codes & employee IDs
- Calculate tip pools / gross sales
- Multiple OT calculations
- Multiple pay rates & changes per period
- 3-tiered Cost Coding transfer sends
- Exclude salaried employees

### Rate Change Tracking

- Records each rate used per job per employee and can run reports of rate changes during pay periods

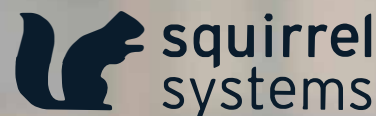

### Demographics import from POS to Netchex

- Connect to the POS and gather employee demographics for a Netchex import file
- Setup to alert different fields based on criteria

### Multi-store configuration

- Setup directly on the POS server or install remote data component to process from the main accounting office

## A Sample of POS Systems Supported by Netchex
